

Evergreen informal hedge planting to soften the boundary all year around whilst improving habitat creation. This is supported with wildflower meadow seed mix planting to offset the site from the boundary and increase the ecological value of the site.

Ornamental hedgerow with natural tree planting and black railings to create a high quality edge to the residential grounds.

Open areas of grassland with footpaths for residential use.

Section A-A', through the west of the site from the western boundary to the western wing of the proposed building.

Ornamental planting consisting of varied textures of perennial, evergreen and native planting to enhance the site entrance.

Curved natural stone walls to highlight the entrance to the site and reflect the quality of the building architecture.

Native deciduous linear hedge planting with all year around interest and ornamental street tree planting to create a high quality boundary that enhances the site whilst improving habitat creation and the ecological value of the site.

Elevation B-B', Along the south of the site showing the high quality street scene and site entrance.
