Planning Application – Objection

Your Ref: 3/2021/0660 and 3/2021/0661

Re: HARP – Works around the replacement of aqueduct at Marl Hill and Bowland Sections.

Dear Mr Macholc & Mr Evans

With reference to the above planning application and as a local resident of Newton In Bowland, which will be severely impacted by the above application, I wish to have my objections recorded and taken into consideration.

In order to avoid repetition, I will not go into detail about concerns already raised around the negative impact on the local community, unacceptable traffic conditions that will result from the project, how it does not follow the National Planning Policy Framework (NPPF) for Areas of Outstanding National Beauty (AONB) or the impact on nature this will have. Suffice to say I agree with all points already made by others.

I wish to bring to light the impact on individuals like me that seem to be totally disregarded by what essentially is a profit-making organisation. You, as a representatives of the community, have a duty of care to your residents, and we rely on you to defend us.

[REDACTED] spring water that comes from the [REDACTED]. The spring from which it comes lies on the periphery of the proposed compound and area of excavation that will be situated in Newton, it's referred to as PWS3-13 within the planning documentation. United Utilities (UU) have within their assessment acknowledged that there is a risk of contamination or disruption to [REDACTED]

I have asked that before works begin they provide an alternative source of water [REDACTED]

[REDACTED]

I ask the council that IF this application is passed, adequate protection is put in place [REDACTED]. That we are not knowing put at risk of [REDACTED] water supply or drinking contaminated water. [REDACTED] first before the problem is addressed.

Yours sincerely
