Overall we are supportive of the application/improvements planned (particularly in respect of the new roof materials) and understand that it should benefit the building and use overall.

Whilst we appreciate the desire to replace the windows with double glazed units, we believe there is value in retaining what is already there on the East facing entrance. Here, the sash windows provide consistency (this is lacking in the other windows at this site) and whilst it may be difficult to determine the age of the windows on this elevation, they are complimentary to the overall appearance of the building and full consideration should be given to their retention.
