

FRONT ELEVATION

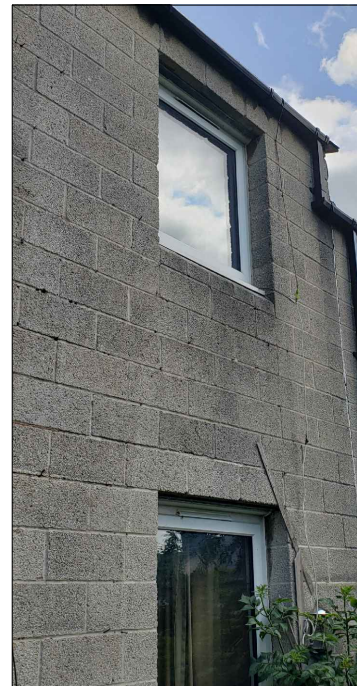

REAR ELEVATION

**Constraints to be considered for EWI installation:**

|   |   |
|---|---|
| Rainwater Pipes, Wastewater Pipes & SVP | No main roof rainwater pipes going to floor on the front or rear only on the outbuilding, short section of pipe connecting gutters of neighboring properties. |
| Background Ventilator Grilles           | To be extended out to face of EWI if still required based on ventilation strategy.  |
| General Facade Fixtures                 | Satellite at front. Metal brackets, clothes line hook at rear.  |
| Boundary Fence/ Concrete Posts          | To be cut back to allow EWI on party wall line. Posts to the rear will have to be considered when installing EWI  |
| Trickle Vents                           | Present on all windows.   |
| Air Source Heat Pump                    | To be moved to allow space for EWI, piping to be moved and extended to face of EWI.   |
| External Tap                            | To be moved and extended to allow space for EWI   |

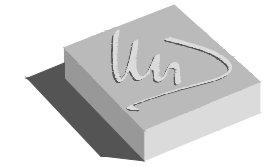

ADDITIONAL

Material Index

1. Roof to be extended to allow eaves extension of min. 40mm past face of EWI
2. Replacement composite doors to PAS24. Colour TBC
3. External wall insulation with cream render finish
4. New black uPVC rainwater goods

Applies to each elevation as required
