## **Description of Proposed Works**

Please describe the proposals to alter, extend or demolish the listed building(s)

Drilling of boreholes within the domestic curtilage and installation of heat pump unit and associated pipework. This will involve the drilling of two boreholes to the side of the property where the current owners park their cars. The pipework from the boreholes will run under the existing tarmac and be connected to the heat pump which will be housed in the external wash-house. A small entry hole (~50mm x 100mm) below ground level will be required in the historic fabric to allow the pipes to enter the building. The heating pipes from the heat pump will then be connected to the house's heating system through the previously approved glass corridor (consent reference 3/2020/0141). Again, small holes will be required in the external wall of the dwelling to provide an access point for the pipework. The pipework will then run through the roof cavity and tee into the existing central heating network behind a modern plasterboard riser. The proposal will involve three penetrations of the historic fabric which is marked as point A, B and C in the photos in Heritage Asset Statement.
