Dear Sirs,

We would like to apply for retrospective planning signs for five advertising/directional signs. These provide information and directions for our wedding guests, many of whom travel from outside the area to attend weddings. We are a dedicated wedding venue serving both the local community and many couples coming from across the country to get married in the Ribble Valley. Rural roads can be challenging for those not used to them and not knowing the area therefore the signs perform an important role in ensuring the arrive safely and on time.

The materials for the signs were chosen specifically to blend in the with landscape. I have enclosed our application and would appreciate you letting me know how I go about paying the fee?

Should you have any questions please don't hesitate to contact me on 

Kind regards

Lynn Scholes
