Planning Application Reference No.: 3/2024/0377

Address of Development: The Pavilion, Sawley Road, Grindleton

Comments: I fully support this application. It will provide clean low carbon energy assisting in our transition to net zero. In my opinion it will not have any adverse effect on the aesthetics of the pavilion or any adverse effect on the village and near neighbours.

Comments: I would like to register my support for the proposal to install solar panel as described in this application. I understand that there is an arbitrary rule that requires solar panels to be installed more than 1 metre from the roof edge in non-domestic installations and that this application proposes an installation close to the roof edge.
For me, the proposed configuration would be aesthetically better than one which followed the more-than-1-metre rule and would, clearly, generate substantially more green energy for the Pavilion.
I am in full support of the installation as presented in the application and cannot imagine any rational reason to decline it.

Dear Sir/Madam

I wish to support the above application for full consent to the fuller roof coverage to the pavilion at the recreation ground, Sawley Road, Grindleton BB7 4QS. On the grounds of:

- a) The permitted development is not cost effective.
- b) The permitted development does not produce as much energy.
- c) The permitted development is not pleasing to the eye, the solar panels need to be to the end of roof.

Please let sense prevail when considering this application.

Kind regards

[REDACTED]
