Hi

Re the planning application from Barnacre road school, new fence, looking at the application it states the fence is 2400mm high.

Where this backs onto existing hedges it will be higher and it will also hinder the maintenance of the beech existing hedge rows,

Could the height be reduced to a low level of 1800mm,

Looking forward to hearing from you.

Dear Lucy Walker

I am writing to you regarding the planning permission to install the 2.4metre high fence with barb wire around Barnacre road Primary School. I object to this proposal and consider it unnecessary and unsightly. I understand you may need to ensure safety of children but a more appropriate fence could be installed.

Planning no:3/2024/0465

Dear Lucy,

I [REDACTED] regarding the proposed erection of the high fence at Barnacre Road school with [REDACTED].

I have been informed by a neighbour that the mesh of the fencing is going to be extremely narrow and tightly together so that it will appear almost like a wall. I was not aware of this and wish to register my dismay if this is the case.

I have seen other school fencing and the mesh has been a reasonable width. Please can you ensure that it is not a dense mesh and also no higher than 1.8m. high. I realise that today is the last day for objections and I know that you have received many complaints.

Thank you.
