☒ No

Please provide a brief description of the building or part of the building you are proposing to demolish

The building is a brick built, single storey outbuilding with a mono-pitch roof. The solid brickwork walls have been rendered externally and the roof is made up of cement/asbestos sheets on timber purlins/rafters. There are two sections of the building with concrete floors and animal stalls.

Why is it necessary to demolish or extend (as applicable) all or part of the building(s) and or structure(s)?

The outbuilding has suffered serious damage to the south west gable. The rear south east elevation is suffering from rotational movement and this is also damaging the adjacent gable and mid walls. The rear elevation retains the floor area and the movement is likely to be due to inadequate or damaged foundations, together with an inadequate section for the earth and floor area. The outbuilding is not considered suitable for retention and re-use due to the significant re-build required.
