notes

1. The client has requested that the design team should consider the impact of the proposed development on the surrounding environment. This includes the need to provide a high level of landscaping and screening to ensure the development is well integrated into the local context.

2. The client has also requested that the design team should consider the need to provide a high level of security and access control to the development. This includes the need to provide a secure perimeter and a high level of surveillance.

3. The client has also requested that the design team should consider the need to provide a high level of sustainability and energy efficiency. This includes the need to provide a high level of insulation and a high level of renewable energy.

4. The client has also requested that the design team should consider the need to provide a high level of accessibility and inclusivity. This includes the need to provide a high level of wheelchair access and a high level of visual and auditory accessibility.

5. The client has also requested that the design team should consider the need to provide a high level of safety and security. This includes the need to provide a high level of fire safety and a high level of security.
