

Tree Work Recommendations

3 Hollowhead Lane, Wilpshire, BB1 9JX

T1 – Sycamore *Acer psuedoplatanus*

Sycamore recommended at the left hand side of the driveway. to be felled due to the raised driveway over the buttress and lower stem of tree causing die back in the right side of the crown. This has been caused by high root compaction and bad design of driveway installed by previous owners. The tree is in a high target area adjacent to the driveway and garden and is in close proximity to the house. See pictures attached.

G1 Leyland cypress *Cupress x leylandii*

Group of Cypress at the right hand side of the driveway recommended to be reduced in height by approximately 3m or one third to reduce the windsail of the trees as they are in close proximity to the house. The trees are to be reduced to an even height all along.

T2 Lime *Tilia Cordata*

Lime recommended at the front of the property to be felled and remove the stump due to root system causing extensive damage and trip hazard to the customers footpath. Removing the tree will allow the customer to get a new footpath installed without damaging the root system of the tree. See pictures attached.
