The old School
Newton In Bowland

**ESTIMATE REPLACEMENT
STONEMASK BELL
TOWER**
27 March 2024

Quantity	Details	Unit Price (£)	Net Subtotal (£)
Service	<p>Proposal of Stonemasonry works to The old school newton in bowland.</p> <p>Having been up and inspected the architectural masonry that incases and holds the old bell, I have come to the conclusion that the necessary work is required.</p> <p>Two replacement pieces are needed to house the brackets and metal work that hold the bell in situ. This is due to the current pieces being split, this has occurred because of the current metal work rusting and fracturing the stonework.</p> <p>The top pieces will all be safely removed and numbered and dropped onto a working platform/ scaffolding. The two damaged pieces will be removed and replaced with two newly masoned pieces matching the originals in all dimensions and shaping. These pieces will be doweled in place with stainless steel dowel. I propose longridge fell sandstone, as the new stone if acceptable.</p> <p>All above stonework will be rebuilt and tied in place using brackets or dowels and repointed using lime mortar.</p>	0.00	0.00
