Planning Application:3/2025/0228, Stanacraft

Since the Parish Council's last response an opportunity has been taken to consult with residents neighbouring the proposed development site. Residents welcome the decision to remove from plans the first floor extension over the existing attached garage and to reduce the overall ridge height of the new construction by 500mm.

We are however, aware of the fact that some residents have reservations regarding the adverse impact of the proposed elevation bordering the front garden of a neighbouring property, namely loss of privacy and light. Given the close proximity of the extension to the front garden of a neighbouring property this is understandable. In support of residents we ask developers to consider whether the height of the proposed extension bordering the front garden could be reduced.
