

SCHWEGLER 1FR BAT TUBE 10184

SPECIES: BAT

MATERIAL: Woodcrete

DIMENSIONS (MM): 200 x 475 x 125

ENTRANCE (MM): 150 x 90 x 20

WEIGHT (KG): 9.8

The tube is designed as a Bat summer roost for bricking-into the external walls of buildings. Due to its small depth of 125mm it is also very suitable for installation in the thermal insulation.

INCLUDES: Bat Tube 1FR

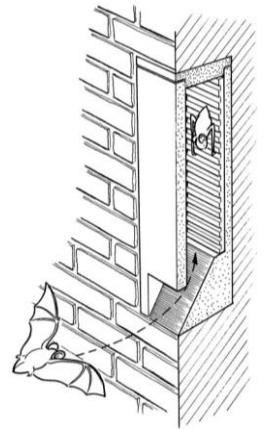

COLOUR: 1FR is delivered in “natural grey”. It can be painted at any time with standard breathable façade paint.

SPECIES: A summer roost for bat species that inhabit buildings.

SITING: Install in façades (brick-in or render-in), in concrete (for example, in bridge structures), or retrofit under weatherboarding during renovation work, etc.

MAINTENANCE: This Bat Tube is maintenance-free, as the droppings can fall slowly downwards, via the special droppings chute.

NOTE: There are two versions. This 1FR bat tube is a single, standalone unit. The 2FR is designed as a modular unit with interconnecting holes so that it can create larger spaces with transverse connections. If the bats are accessing the building interior, then we recommend multiple 2FR units. Please see related products.
