

Hawkshaw Farm – car parking proposal

Car parking markers on gravel car park

A number of options for marking out the parking spaces on the existing and proposed car parking are currently being considered. The markers need to be flush with the ground and capable of withstanding being driven over.

Option 1 – stainless steel plates

These are stainless steel plates with spikes to secure them in the ground

Option 2 – plastic floor pegs

White plastic pegs which push into the gravel

Option 3 – lay timber markers on the ground

This image shows tall uprights which could be used to de-mark the pedestrian walkways

Option 4 – space marker for gravel and field parking
