

HAIGH CYCLE SHELTER

ABOUT THE HAIGH CYCLE SHELTER

The Haigh Cycle Shelter is a versatile, modular shelter that can be used as a cycle shelter or waiting shelter with many additional options. Manufactured from robust box section steel, it is hot dip galvanised as standard for longevity with optional powder coating or a coloured appearance.

The Shelter is clad in PETG UV sheeting to keep cycles dry, protect against harmful UV rays and its transparency gives maximum visibility. Popular options include cycle racks, different end panel configurations, and fully enclosed with gates.

DIMENSIONS

The Haigh Cycle Shelter is 2160mm high as standard, with a depth of 2060mm.

Available lengths of 3000mm, 4100mm, 5000mm or 8000mm.

FIXING

The Haigh can be installed to surface level with adjustable baseplates or submerged fixed for a cleaner and more secure fitting.

STANDARD OPEN SHELTER

GALVANISED STEEL

Heavy duty mild steel frame and uprights Hot-dip Galvanised to BS EN ISO 1461:2009 for maximum corrosion protection.

POLYESTER POWDER COATED

Polyester powder coated for a smooth, vibrant and long lasting finish

MULTIPLE RUNS

INSTALLATION WITH SHEFFIELD CYCLE STANDS

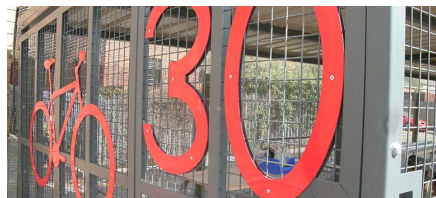

FEATURES

- ☐ Heavy duty box section construction with load-bearing purlins and baseplates
- ☐ Clear view PETG UV glazing fully transparent and UV protected
- ☐ Back to back, multiple runs or single
- ☐ Wide range of stands, racks and options
- ☐ Hot-dip Galvanised for 100% corrosion resistance

OPTIONAL EXTRAS

- ☐ Integral Racking

- ☐ Enclosed with security gates

- ☐ Cycle stands & racks

- ☐ Powder coated framework

- ☐ Supplied flat packed for easy on site assembly

- ☐ Full installation throughout all UK postcodes
