Dear Sirs

Partnership of J Seed & Sons

I write to confirm that John Moon was added to the partnership of J Seed & Sons on 1st October 2024.

J Seed & Sons is a farming partnership involved in the labour intensive production of milk from dairy cows. The farming business commenced over 40 years ago with John Seed and Stephen Seed as partners. In the course of the business John and Stephen have both had their own separate houses and over the last 10 years the business has had to increase its stocking and assets to be able to survive the fluctuations of agriculture. John Moon has been crucial in providing the added support for the business to be able to survive and accordingly John Moon has been brought into the Partnership to accurately reflect his role.

John Moon is now needed by the farm to live on the Holding so as to be able to assist with the care of the increased numbers of livestock which is a full day and night occupation and not something that can be attended to solely by John and Stephen Seed and nor is it economical or logistically reasonable for John Moon to continue commuting from his current residence which puts him off far away from the holding in times of emergencies.

In permitting the conversion and development of an existing derelict barn, this will allow John Moon and his family to have a residence on site to be able to support the farming business and which will furthermore assist in future succession for the farming family going forwards.

Yours sincerely,
