Demolition of existing rear conservatory and construction of single storey rear extension and new front porch. Addition of new render and composite boarding to external elevations

ASSESSMENT OF PROPOSED DEVELOPMENT:

Site Description and Surrounding Area:

The application relates to a detached two-storey dwellinghouse at no.11 Whittam Crescent. The property comprises brick and timber cladding to the external elevations and uPVC/ timber windows and benefits from an integral garage and side dormer. The site to which the proposal relates is located within the Open Countryside, approximately 230m south of the defined settlement area of Calderstones and 200m north-west of Whalley.

Proposed Development for which consent is sought:

Consent is sought for the redevelopment of the existing dwellinghouse, including the demolition of the existing conservatory and construction of a single storey rear extension, new to roof to the existing garage and new front porch. As part of the overall proposal new render and external cladding is proposed.

Principle of Development:

The proposal relates to the domestic extension of and alterations to an established residential property and is therefore acceptable in principle subject to an assessment of the material planning considerations.

Impact Upon Residential Amenity:

The proposed openings would provide similar views to those afforded by the window configuration featured to the existing dwellinghouse and therefore no new opportunities for direct overlooking or loss of privacy are anticipated in this respect.

It is also not considered that the proposed re-modelling works would result in any significant undue harm upon any neighbouring residents by way of overshadowing, loss of outlook or daylight. The proposed front porch would remain approximately 5m from no.13 Whittam Crescent at its closest point and given the orientation of the application property in relation to this adjacent residential property and the relatively small-scale of the front porch, the proposed additions are not expected to result in any greater impact than that of the existing built form.

The proposed lean-to roof to the existing flat roof integral garage would also comprise a relatively minor addition to the application property and therefore would not result in any measurable adverse impact upon no.9 Whittam Crescent. The proposed rear extension would also comprise a rearward projection of 5m and would be adequately distanced from both nos. 9 and 13 Whittam Crescent so as to mitigate any resultant impact.

Taking account of the above, the proposed works are considered acceptable with respect to impact upon residential amenity.

Visual Amenity/External Appearance:

The proposed single storey rear extension would not be afforded a high level of visibility from the adjacent public realm, being sited to the rear of the application property and therefore screened from view by the dwellinghouse itself. Notwithstanding this, the proposal would appear appropriate in both size and scale in relation to the existing built form of the dwelling and therefore would not result in any significant detrimental harm upon the existing visual amenities of the application property or surrounding area.

The proposed porch is of a modest overall footprint with an eaves and ridge height that is relative to that of the main dwelling. It would not result in a dominant addition to the property. The proposed incorporation of

a lean-to roof to the existing flat roof integral garage is also considered acceptable in this particular instance, given numerous other properties within the immediate vicinity of the proposal site benefit from a similar addition, namely nos. 13 and 15 Whittam Crescent.

The incorporation of render and boarding to the external elevations of the property would also remain in keeping with the external facing materials utilised within the existing street scene. Details of the proposed light grey boarding have been submitted and are considered appropriate with similar variation being found in the vicinity.

Taking account of the above, the proposed works would not result in any significant detrimental impact upon the existing visual amenities of the immediate or wider locality that would warrant the refusal to grant planning permission in this particular instance.

Highways and Parking:

Lancashire County Council Highways have been consulted on the proposed development and raised no objection. Three parking spaces could be accommodated on the driveway to the front of the property which accords with parking standards.

Landscape/Ecology:

A Preliminary Bat Roost Assessment Report has been submitted with the application dated 30th March 2025. The report concludes that no evidence was observed to suggest use of the building by nesting birds, and no evidence was recorded to suggest bats were roosting within the building. The property is considered to be of negligible potential for roosting bats and the survey efforts are considered reasonable to assess the roost potential of the buildings with no further survey work deemed necessary.

Despite this, a Precautionary Method Statement and Reasonable Avoidance Measures are recommended in order to minimise or remove any potential disturbance to roosting bats. The measures outlined within this section of the report have been secured by way of a condition.

The development is exempt from achieving the mandatory Biodiversity Net Gain requirements as it is a householder application.

Observations/Consideration of Matters Raised/Conclusion:

As such, for the above reasons and having regard to all material considerations and matters raised, the application is recommended for approval.

RECOMMENDATION:	That planning consent be granted subject to the imposition of conditions.
