Description of Proposed Works

Please describe the proposed works

Erection of open sided carport.

The carport is beautifully designed, discreet and is there to protect the cars from weathering. There are no sides to the structure, so it has simple lines and will blend in naturally to the area which has been landscaped to accommodate it. It cannot be seen by the neighbours as large trees obstruct their sightlines and only the roof will be partially viewable from the road. It is barely visible from the house. It will have a small charging point added to an upright so that cars can be charged while being protected from the weather. Every effort has been made to create a natural addition to the property.
