<b>Relevant Planning History:</b>

Extensive across both the Farm Park and adjacent Farm

#### **ASSESSMENT OF PROPOSED DEVELOPMENT:**

##### **Site Description and Surrounding Area:**

The application relates to Hawkshaw Farm, located off Longsight Road (A59) which comprises a large range of agricultural buildings, as well as Mrs Dowsons leisure and educational family attraction. Part of the site is used on a seasonal basis to operate the Scare Kingdom Halloween visitor attraction.

##### **Proposed Development for which consent is sought:**

Proposed is an expansion of the existing car park on existing agricultural land.

##### **Principle of Development:**

Key Statement EC1 of the Core Strategy states:

‘Developments that contribute to farm diversification, strengthening of the wider rural and village economies or that promote town centre vitality and viability will be supported in principle.’

Notwithstanding this general policy support offered to schemes which support the rural economy, it is necessary to apply Policy DMG2 to ascertain whether or not the principle of development is acceptable.

Policy DMG2 of the Core Strategy requires development outside of defined settlement areas to meet at least one of six exceptions which are as follows:

1. The development should be essential to the local economy or social well-being of the area.
2. The development is needed for the purposes of forestry or agriculture.
3. The development is for local needs housing which meets an identified need and is secured as such.
4. The development is for small scale tourism or recreational developments appropriate to a rural area.
5. The development is for small-scale uses appropriate to a rural area where a local need or benefit can be demonstrated.
6. The development is compatible with the enterprise zone designation

Furthermore, Policy DMB1 of the Core Strategy states:

‘Proposals that are intended to support business growth and the local economy will be supported in principle...The expansion of established firms on land outside settlements will be allowed provided it is essential to maintain the existing source of employment and can be assimilated within the local landscape.’

In this instance, the proposal relates to a well-established business operation located outside of the Borough’s defined settlement areas. The farm park has experienced significant growth since the original car park was approved in 2018 (xx) , in terms of leisure and educational offer, staff and visitor numbers. Evidence of overspill of the existing car park into the field in peak periods has been submitted. Therefore, expansion of the existing car park is considered necessary to support the continued business operation, and could be considered as essential to the local economy of the Borough on account of the associated benefits delivered to the economy through the operation of the business.

In light of the above, it is considered that the development would satisfy the provisions of Key statement EC1 and Policies DMG2 and DMB1 of the Core Strategy and is therefore considered to be acceptable in principle.

**Impact Upon Residential Amenity:**

The nearest residential properties are occupied by workers of the farm (same ownership of the farm park). Given the existing background noise levels from the current business uses and traffic along the A59, no adverse noise levels are identified as a result of the car park expansion.

**Visual Amenity/External Appearance:**

The applicant was invited to amend the scheme by omitting a bund initially proposed along the A59 and revising the layout to remove the furthest row of parking from the site entrance and repositioning these spaces to the east. This is considered to result in an improved visual impact and increase the green buffer retention between the car park and A59.

The car park will have an urbanising impact on the countryside character, by placing hardcore on an agricultural field, particularly when seen from the adjacent PROW and A59. However it will be seen against a backdrop of existing development and this impact is only really apparent from immediate short distance views, as such any visual impact is not considered to result in significant adverse impact to justify refusal of the scheme when considered against policies DMG1 and DMG2.

Conditions can secure details of materials and control lighting.

**Highways / PROW:**

The applicant

**Ecology / BNG:****Observations/Consideration of Matters Raised/Conclusion:**

The proposed development, as amended, is considered acceptable in principle and would not result in any harm to the amenities of nearby residential receptors or the visual amenities of the immediate or wider area to an extent which would justify refusal of the scheme. Conditions are needed in the interests of design, visual impact and highway safety.

It is for the above reasons and having regard to all material considerations and matters raised that the application is recommended for approval.

<b>RECOMMENDATION:</b>	That the application be approved.
