Planning Application Reference No.: 3/2025/1002

Address of Development: Carr Hall BB1 9LJ

Comments: The fact the application discusses a weigh bridge indicates that extremely large vehicles will be entering from / exiting onto a very busy main road that already suffers from speeding & is extremely close to a junior school. The fact a cabin is discussed in the application infers the amount of traffic will be high level.

This site has already become a visual eyesore in a rural area and more storage will increase its negative impact.

I am also concerned about fuel and lubricant leaks entering the water course, because 141 vehicles is a huge amount for this site.

RVBC need to reject the application for increased traffic, road safety, noise pollution, light pollution, visual impact; and potential pollution of the water course.
