Re: Application – 3-2026-0033

This application is for the use of a converted temporary building for selling hot food and drink, a separate area which was formally a helicopter landing pad within the site is to be used as a seating area with tables and chairs.

Refuge bins will be kept within the frontage of the unit and will be removed daily to the main storage area on site where they will be separated into waste and recyclable materials.

A specialist contractor will remove the waste along with the existing business waste.

Images below show the original mobile vehicle before conversion and the finished clad unit along with images of the existing area that is to be used for seating.

Mobile cabin before and after with non permanent fascia

Images of the existing area that is to be used for seating in conjunction with the food cabin
