Dear Maya,

Chipping Parish Council discussed application ref 3/2026/0296 *Prior notification for proposed installation of a 15m telegraph pole supporting 3no. antennas, 2x 0.3m dishes, 3no. equipment cabinets and ancillary development thereto including 1.2m fence with 3m double access gates and underground cabling on land adjacent to Cold Coate Farm Buildings, Chipping.*

The Parish Council is mindful of the visual impact of the 15m mast within the National Landscape but understand that attempts to mitigate the impact by choice of colour and position have been taken. The photo montage report was reviewed and found particularly useful from this respect.

Mobile phone reception has become increasingly important to residents and visitors to the parish in the last few years. In some areas mobile reception is poor to non-existent. This is particularly of concern to those residents who have had to move to digital landlines; in the event of a power cut and without mobile signal they no means to communicate.

On balance Chipping Parish Council is supportive of the application for a new mast on the understanding it will improve mobile reception and eliminate 'not-spots' in the parish.

Regards,

Paul Hunt

On behalf of Chipping Parish Council
