Dear Sir or Madam

Planning consultation: Proposed livestock accommodation building

Location: Gregsons Farm, Settle Road, Newsholme BB7 4JF

Thank you for your consultation on the above dated 03 June 2026 which was received by Natural England on 03 June 2026.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

SUMMARY OF NATURAL ENGLAND'S ADVICE

Natural England advises that the potential for air quality impacts arising from this development needs to be assessed. Natural England refers your authority to Standing Advice [*'Air pollution and development: advice for local authorities. How to assess sector-specific planning applications that could affect air quality on a protected site'*](#).

Based on the plans submitted, no other environmental impacts have been identified that will have significant impacts on statutory protected sites.

Natural England's generic advice on other natural environment issues is set out at Annex A.

Statutory Protected Sites Advice

Natural England advises that the potential for air quality impacts arising from this development needs to be assessed. Natural England refers your authority to Standing Advice *'Air pollution and development: advice for local authorities. How to assess sector-specific planning applications that could affect air quality on a protected site'*. This standing advice is Natural England's formal statutory advice and is a material consideration. It provides decision makers with the information needed to fulfil their statutory duties when making decisions on planning applications with potential air pollution impacts.

An overall conclusion regarding impacts on statutory protected sites¹ must take into account the standing advice for air pollution. This will be for your authority to determine.

Based on the plans submitted, no other environmental impacts have been identified that will have a significant impact on statutory protected sites.

For any general enquiries on Natural England's standard advice letters and our Standing advice '*Air pollution and development: advice for local authorities. How to assess sector-specific planning applications that could affect air quality on a protected site*', please send your correspondence to LPA-AQStandingAdvicequeries@naturalengland.org.uk.

We aim to respond within 10 working days.

Please note we will not respond to case specific queries. If the proposal is not in a category which is covered by the standing advice you should send it to consultations@naturalengland.org.uk.

Yours faithfully

Helen Churchill
Consultations Team
