New for 2024

SLIM MIDRAIL COMING MARCH 2024

The styling details of our sash windows are now more rooted in history than ever before. The new 37mm slim midrail will reaffirm **Legacy's** position as one of the most authentic sash windows on the market ideal for period properties or homes in conservation areas. Available with run-through sash horns and in selected colours only.

WEATHER BAR

The weather bar is a component of the window frame that is designed to prevent water and air from entering the building. It is typically made of metal or plastic and is installed on the exterior side of the window frame.

ASTRAGAL BARS

Astragal bars are used to seal the gap between two glass panes in a double-glazed window. They are typically made of metal or plastic and are installed on the interior side of the window frame.
