Planning Application Reference No.: 320270419

Address of Development: Former Pitch and Putt Field, Edisford Road

Comments: This would create a much needed opportunity for local kids and families to be on their bikes, in a safe environment and not on the streets. Clitheroe really needs to cater more for young teenagers too, and there are plenty of them who ride bikes, but have to travel out of town to access pump tracks. It would be an incredible addition to the community. And keep kids safe, active and out of trouble.

Comments: A pump track would provide a safe, dedicated space for children and young people to be active, develop cycling skills, and enjoy spending time outdoors. It encourages healthy lifestyles, improves confidence, and gives families a positive, free recreational facility that can be enjoyed throughout the year.

Facilities like this also benefit the wider community by creating a place where families can meet, children can socialise in a healthy environment, and young people have a constructive activity close to home. Providing engaging outdoor facilities can help reduce antisocial behaviour by giving children and teenagers somewhere safe and enjoyable to spend their free time.

Investing in facilities that promote physical activity, wellbeing, and community engagement is an investment in the future of our town. I hope the planning officers and councillors recognise the long-term health, social, and economic benefits that a pump track would bring to local children, families, and the wider community.

Comments: I am writing to express my full support for the proposed pump track in Clitheroe. As a mother [REDACTED], I know firsthand how much our community needs a dedicated, active space like this.

Right now, there are very few outdoor areas in town that cater well to kids as they grow, especially those who love bikes and scooters. This means we currently have to travel to visit these outdoor facilities. It's not just about the exercise; it's a social hub. It gives kids a positive, free place to meet up with friends, make new ones, and engage in a healthy community hobby.

This track would be a fantastic investment in the health, well-being, and future of Clitheroe's young people. My boys would use it constantly, and I know many other local parents feel exactly the same way. I strongly urge the council to approve this wonderful project.

Comments: I think the pump track design looks amazing and will be a great addition to the town. The town is lacking in things for family's to do that encourage getting outdoors and in a safe environment. It will provide great entertainment for all ages and a space to perfect biking skills.

Comments: This would be a great addition to the town and more importantly for the children of our town. Beyond the castle park and skate park there is nothing else for children to do outside in our town. I strongly support the building of this new facility, our children desperately need more local activities and the building of the pump track would mean many parents would no longer need to travel out of town to provide their children with an alternative outdoor activity. The pump track also caters for all ages, I have a young child and an older child who would both enjoy this new facility. Furthermore, I believe the new facilities would also create more opportunities for local businesses as visitors are more likely to explore our town following their visit and so everyone benefits. Please approve this application.

Comments: A pump track would provide significant community value. My son previously had daily access to one [REDACTED], and it greatly improved his physical activity levels, reduced screen time, and supported his social development. The accessibility of such a facility is key it offers a safe, local, no-cost environment for young people to engage in healthy recreation. Establishing a pump track in our town would promote wellbeing, community engagement, and positive youth development.

Comments: The addition of a Pump Track on Clitheroe would be extremely welcome. It can be difficult to find somewhere nearby where children can ride their bikes safely (away from roads) due to the rural nature of where we live. It would encourage children to exercise and something for children of all ages to participate in! I for one would be really keen to see this within the Clitheroe area and feel it would very beneficial to our children and young people! At a time when we are trying to move children away from screen time and social media we need to provide children and young people with alternative activities to engage with.

Comments: Would love this to happen. My children struggle finding outdoor spaces to exercise where we live in Clitheroe as the roads are dangerous to ride bikes on. We have had several accidents to date already so a safe space to play and burn off some energy would be fabulous

Comments: I think this will be a great addition to Clitheroe. There are no provisions for cycling in the town and will be a great addition for young people and adults alike. There will be no need to travel to use a pump track and will also bring more people to the area to use the facilities which in turn will bring more spendnig to the area.

I cant recommend this enough. I will be there all the time !!

Comments: We have been following the potential development of a pump track in Clitheroe with much excitement. We regularly travel to other tracks and would be over the moon to have one on our doorstep for our local kids to use. Another massive tick for our lucky children of Clitheroe!
