

MODULAR DOOR

Overview

The Bamford *Modular Door* is a visually appealing security door, which provides excellent resistance against vandalism and forced entry.

Constructed using our exclusive heavy duty, hardened aluminium section, which can be designed to give a wide choice of door styles to suit virtually any application.

The smart design is more appealing for customers who still require strength of application but less 'industrial' in its appearance.

Specification and Advantages

Manufactured using the same engineering techniques as our standard range, the aluminium modular door offers: -

- A variety of different designs which can be fully DDA compliant including porches, bespoke screens etc.
- Can incorporate virtually any door access and mechanical/electromagnetic locking system.
- The door leaf is re-baited into the centre of the frame and hung on a continuous piano hinge.
- Can accommodate either a surface mounted, concealed closer or automatic operator
- Low level integral DDA compliant threshold strip.
- All screws and fixings are fully concealed
- Can incorporate different types of glazing such as laminated, toughened, double-glazed, polycarbonate and Georgian wired glass.
- Silver anodised or powder coated finish including a wood effect finish
- Manufactured from aluminium, which is fully recyclable and light weight.
