

# SCHWEGLER 1B BIRD BOX - 32MM HOLE

EXTERNAL DIMENSIONS: 170 x 260 x 180 mm  
INTERNAL DIAMETER: 120 mm  
ENTRANCE HOLE: 32 mm  
WEIGHT: APPROX. 3.6 kg  
MATERIAL: Woodcrete  
INCLUDES: Nest box, hanger and aluminium nail

The Schwegler 1B Nest Box is one of the most widely used and trusted woodcrete nest boxes in conservation. In production for almost 50 years and with millions installed worldwide, it is designed to provide a long-term, stable nesting environment for small hole-nesting birds.

## KEY FEATURES

- Manufactured from durable woodcrete
- Low maintenance design
- High occupancy rates
- Suitable for a wide range of small hole-nesting birds
- Easy-open front panel for inspection and cleaning
- Supplied with hanger and aluminium nail for safe tree fixing

## MATERIAL & CONSTRUCTION

The 1B is made from woodcrete – a specialist blend of wood fibres, clay and cement. This material is rot-proof, weather-resistant and breathable, providing excellent thermal insulation. It keeps nest chambers cooler in summer and more stable in winter compared to standard timber boxes. The robust construction also helps deter predators and ensures a long service life.

## SUITABLE SPECIES

Great Tit, Blue Tit, Marsh Tit, Coal Tit, Crested Tit, Redstart, Nuthatch, Pied Flycatcher, Collared Flycatcher, Tree Sparrow, House Sparrow

## INSTALLATION

- Attach to a tree using the aluminum nail supplied, or fix to a wall
- Recommended height: 1.5 to 3 meters above ground
- Ensure a clear flight path to the entrance

## MAINTENANCE

The front panel can be easily removed for inspection and cleaning.
