

WASTE MANAGEMENT STRATEGY

Unit 3, Deanfield Drive, Link 59 Business Park, Clitheroe, BB7 1QJ
Ribble Valley Tanning Ltd – Retrospective Change of Use

1. Existing Waste Storage

An existing 660-litre Eurobin is already provided on site for the storage of general commercial waste arising from the premises. The existing bin provides suitable capacity for the current business activities and no additional external waste storage facilities are proposed as part of this retrospective application.

2. Waste Collection

The Eurobin is collected once each week, every Thursday, by Fresh Start Waste. Waste is therefore removed from the site on a regular scheduled basis and is not permitted to accumulate around the premises.

3. Nature of Waste

Ribble Valley Tanning Ltd operates as a customer-facing tanning salon and the separately operated Inked by Kia area is used as a tattoo studio. The uses do not involve manufacturing or industrial production. General commercial waste is contained within the existing Eurobin pending collection. Any waste requiring specialist handling is managed separately by the relevant business in accordance with its applicable waste-management obligations.

4. Storage and Collection Arrangements

The existing Eurobin is retained on the premises in the established waste-storage area and is made available for the scheduled collection. The retrospective change of use does not require any enlargement of the existing waste-storage area or any alteration to the existing collection arrangements.

5. Conclusion

The existing 660-litre Eurobin and weekly Thursday collection by Fresh Start Waste provide an established and regular arrangement for commercial waste generated at the premises. No additional waste-management infrastructure is proposed or considered necessary as part of this application.
