*postCode:* [REDACTED]

*refNo:* 3/2021/0047

*addDev:* Spout Farm Longridge

*comments:* The adjacent wetland - Alston Wetland provides vital habitat for ground nesting birds - particularly Little Ringed Plover, which is an African Migrant. Secondly, passage migrant birds such as Whimbrel use the site to roost in Spring. Finally the threatened bird - Curlew also use the site to roost. Some form of Predation Fence is necessary to protect this fantastic site for both the wildlife and the people of Longridge who have enjoyed the area for many years.
