

Appendix 1

Key Views & Photomontages

April 2012

LEVEL OF VIEWS IMPORTANCE:

- National - Views from national trails/long distance recreational routes;
- Regional - Views from regionally important recreational routes, and the strategic road network;
- District - Views from important undeveloped areas;
- Local - All other views, including views from the local road and public footpath networks.

POTENTIAL DEGREE OF VISIBILITY OF PROPOSED DEVELOPMENT:

- | | |
|---|-------------------|
| 1 | Highly visible |
| 2 | Partially Visible |
| 3 | Scarcely Visible |

POTENTIAL PROMINENCE OF VISIBILITY OF PROPOSED DEVELOPMENT:

- | | |
|---|----------------------|
| 1 | Very prominent |
| 2 | Reasonably Prominent |
| 3 | Not Prominent |

SENSITIVITY OF VISUAL RECEPTORS:

- High - Users of public footpaths whose attention or interest may be focused on the landscape. Residents whose views or visual amenity may be affected.
- Medium - Road users.
- Low - People engaged in their every day work activities whose attention is less focussed on the landscape.
