To John. Machloc . I have concerns regarding the routing of heavy plant through Chatburn for Haweswater project. At present there is a weight limit on goods traffic through village. This would require lifting in order to this were to take place, So not only would Haweswater traffic be allowed but other traffic would be allowed also. Also are there any plans to install pollution level recording equipment in the village. P.S. I have read the proposal to re route the traffic down the Pimlico link road and over a temporary bridge over the river. This seems a good solution, as it removes the need to travel through three villages, and it would be a benefit to the contractors having country roads also.
