I would very much like to see this application for the creation of a community pub/restaurant succeed because (a) it would tighten and secure community bonds, (b) it would benefit from passing tourist trade, cyclists and hikers, (c) if a shop facility is provided, locals would not have to drive to towns to get their provisions, hence fuel emissions would be reduced and this would benefit the environment. It would add to the charm of this lovely village, thus elevating the profile of Lancashire. Local jobs may be created. It could be the nucleus of the community and day-trip destination of visitors, both near and far afield, keen to explore this beautiful area. It could provide a marketplace for local producers, therefore no 'air miles' be involved in getting food from table to place. Many thanks, [REDACTED]
