Comments: These boards will leave a blot on the historic tudor village of Whalley. They are not inkeeping with the village charm, which in itseld attracts a large amount of tourism

Comments: The proposed 3m LCD display is a scar on the village of Whalley and I strongly oppose it. The area is one of outstanding beauty and this will ruin the village.

Comments: 3/2023/0004 I most certainly do not think that 3 meter high LCD lights on either side of the road close to the zebra crossing is a good idea, they would surely be a distraction to drivers. [REDACTED] They would also be totally out of character for our lovely village centre. Totally inappropriate and unnecessary!

Comments: This application would clearly be detrimental to Whalley village centre and its homes and businesses. It is aesthetically displeasing and entirely out of keeping with the character of its surroundings. The existing phone box that this is proposed to replace is against a wall and very unobtrusive. However, the proposed application is on the pavement, reducing space for pedestrians and causing a visual and physical obstruction.

In addition, the applicants appear to anticipate that this installation will encourage anti-social behaviour, such that they have included a management plan within their application. Whalley is already subject to increasing anti-social behaviour with limited police resources. Therefore, it would be extremely foolish to grant planning permission to an application that appears likely to precipitate further incidents. This application is wholly inappropriate and unnecessary and should obviously be refused.

Comments: I oppose the erection of the BT HUB with advertising display. This proposed BT Hub with associated display of advertising to both sides of the unit is not in keeping with the street location of Whalley ; a place correctly described in tourist information 'a place steeped in history, rural charm and natural beauty.'

The hub would not blend well with the mock Tudor fronts of the houses on the street and the many much earlier buildings. It is unsuitable due to the close proximity to the Church and to Whalley Abbey (a Grade 1 listed building and a Scheduled Ancient Monument) with the retreat centre.

The unit would, perhaps be acceptable in a busy modern urban setting or a very commercialised seafront setting. The hub is not appropriate for a large village location that is promoted as place for tourists to visit and would negate the quaint, attractive overall impression of the village tirelessly maintained by numerous independent retailers.

In short, the Hub would be an incongruous construction and detrimental to the future of Whalley as a tourist location.

Comments: This village street features some of the oldest and most characteristic properties in the whole area and they are iconic with the Whalley village scene. The Whalley Conservation Area map accessible on RVBC website: <https://www.ribblevalley.gov.uk/downloads/download/33/whalley-conservation-area> lists this area within the conservation boundaries and the properties either side of the street (that these screens would sit in front of) as Buildings of Townscape Merit. The installation of digital screens is not appropriate for a village and does not add anything positive to the aesthetic of the village centre, which has been (and hopefully will continue to be) carefully preserved.

Comments: Yet another application to change the look of one of the prettiest villages in the Ribble Valley. Is it really necessary to have a large tech/advertising screen outside the lovely and historic black and white buildings. Will it enhance the look of the village? No!!

Will it improve the lifestyle of Whalley residents? No! Do the majority of residents in Whalley want it? No!! Why spoil the look of this pretty village with unnecessary advertising screens. Most of the recent applications that have taken place on King Street have been tastefully done and blend well into the village architecture. A brightly lit flashing advertising screen does not blend well and will be seen as a real eyesore! I hope the outcome shows that our local councillors care as much as we do about preserving our special villages, which are very much seen as tourist destinations for our many visitors to The Ribble Valley.

Comments: I am writing to object to the applications made by BT for planning permission and advertisement consent for a Street Hub Unit in King Street, Whalley. The proposal is for a double sided internally illuminated advert hoarding measuring 1236mm wide by 2980mm high. The site is located on a well used pavement within the conservation area and the proposal by reason of its prominent siting, excessive size, bland design and method of illumination will add clutter and neither preserve or enhance the special character of the conservation area. The enablement of wifi will not override these considerations and the applicant's assertion that the unit will replace the nearby unobtrusive telephone kiosk, which does not contain advertisement material, is somewhat disingenuous. This is in essence an application to provide a means of obtaining advertising revenue and should be refused.

Comments: I object to this application as it will not be in keeping with the village. The black and white buildings behind this sign are iconic and contribute to the identity of Whalley Village. Positioning a giant illuminated sign in the middle of these would ruin the look and the street landscape. The size of this unit is not appropriate to the size of the village centre. I understand how this may be suited to a city centre, but Whalley is a village, with residential houses nestled amongst business. I cannot see how anyone who cares about protecting the individual look of Whalley could in all conscience approve this application. I strongly object.

Comments: I have just seen two separate planning applications for large LCD displays to be erected in whalley village centre (application 3/2023/003 & 3/2023/004).

I'm sure you will agree these will look totally out of place and ruin our lovely high street. I urge you to totally reject these proposals as they are not needed nor wanted in the centre of whalley

Comments: Totally out of character for the surrounding area. It will not only be a blot on the landscape but also a hazard. Whalley does not need or deserve this sort of advertising signage. As a Whalley resident and Council Tax payer I am absolutely against this application.
