Subject: Chipping Congregational Church

Ref. 3/2021/0461

I am writing to you regarding the planning application for a cross to be placed on the outside wall of the church. I believe that this would be a good idea as the Cross is central to our beliefs as a church and placing an illuminated cross on the outside wall of the church would make it look more like a church as some people even in the village don't realise that there is a church there.

The church is in such a position in the village of Chipping that it is not that near any housing so that any light that may shine from the Cross wouldn't be a nuisance to surrounding residents.

Please accept this email in support of placing a illuminated cross on the outside wall of Chipping Congregational Church

Yours sincerely
