Supporting information for proposed safer vehicle crossing (drop kerb) entrance to 8 Longridge Road

"When United Utilities started work on the rising sewer main in February 2020 our neighbours at [REDACTED] reported they had damaged numerous Yorkstone flags with heavy plant machinery which United Utilities were asked to repair. United Utilities therefore found a better area to work using the new parking area of our own property.

Since United Utilities have been working in this area we have realised the proposed new vehicle crossing would be **much safer** and allow easier access to drive on/off our property in a forward gear.

The proposed new vehicle crossing would also provide much better splay visibility in both directions of Longridge Road than the current entrance as our neighbours at [REDACTED] have highlighted in the past (please see attached)."

Kind regards,

[REDACTED]
