

We offer the very best quality

From design to materials, in workmanship, erection and service, the emphasis is on quality, so that you can enjoy your **Lugano** for as long as possible.

The best in German quality

a well-conceived system from a single source

Secure mounting, easy opening – and many interesting details

Easily opened

The smooth-running removable hand winder, makes the **Lugano** easy to operate. It takes even less effort to open the shade using the drill-adaptor provided. Simply put the adapter in a cordless drill or screwdriver, insert into the crank and the parasol opens!

Securely mounted

The safest and securest way to mount the **Lugano** large sunshade is to use a ground sleeve or screw-on base. The stone stand, however, offers greater flexibility. With weights of 190 or 240 kg, the **Lugano** large sunshade definitely has its feet firmly on the ground.

Longevity

We do not cut corners on any parts. All of our screws, nuts and bolts are of stainless steel, so they will really last. All other metal parts are elaborately powder-coated, which makes them impact and scratch-resistant.

Complete with table top

For events without seating, the table top is an ideal solution. The table top has a diameter of 1.2 m and can mounted at table, or bar counter height.

Looking after your sunshade

We recommend the protective cover with zip – for easy use, day in, day out. (Not available for parasols with an advertising sign).

Important information about the Lugano large sunshade:
The acrylic fabrics of the **moments** collection excel through quality workmanship and tear-resistance to ensure the product's longevity. Special processing makes them additionally UV-resistant. Thanks to modern nano-technology, the fabric also repels dirt and water. Since acrylic fabrics can be stretched less than **Luga-Tec**, light crease marks may develop. On the other hand, acrylic fabrics keep their colour better over time.

The **Lugano** is primarily a sunshade, so should be closed in case of wind or rain. Fabric creases more easily when it is wet, so the shade should be allowed to dry before being wrapped away. Be sure to be careful of strong gusts when closing the parasol. Small parts such as the winding handle, are supplied in black (similar to RAL 9005), white (similar to RAL 9016) or gray (similar to 7319), depending on the frame colour. We reserve the right to make technical changes. For technical reasons the colours may appear different in print.
